Forecast for Sunday 21 Jul 2024

Weather: Cloudy with patchy rain and drizzle during the early hours, but this quickly clearing around dawn to give a fine and dry morning with plenty of sunshine. Some fair weather cloud will develop with perhaps the odd afternoon shower developing. Feeling fresher than of late but still warm in the sunshine. Cloud thickening during the evening, with rain and drizzle towards midnight.

Chance of cloud-free hill tops above 600m: 10% during the early hours, quickly rising to 100% with cloud lifting above summits around dawn. Deteriorating to 20% late in the evening.

Low cloud and visibility: Widespread cloud as low as 400m during the early hours quickly clearing east, the visibility becoming excellent all-around with distant hills clearly visible. Visibilities falling late in the evening as widespread cloud with bases 400-600 m developing towards midnight.

Meteorologist's View

High levels of UV are expected, especially during the middle of the day giving a risk of sun burn. Note the deterioration in navigation conditions later in the evening.

Forecast for Monday 22 Jul 2024

Weather: Cloudy with patchy rain and drizzle during the early hours. The cloud tending to break up after dawn with bright and sunny spells developing. Many areas will be dry throughout the day, although the odd light shower may develop during the afternoon. Staying dry throughout the evening, with a mix of cloud and clear spells.

Maximum wind: Westerly or southwesterly 25-30 mph with gusts up to 35 mph.

Chance of cloud-free hill tops above 600m: 10% before dawn, rising to 100% by mid-morning as cloud lifts above the summits. Falling to 70% later in the evening as some patchy cloud with bases around 400m develops towards midnight.

Low cloud and visibility: Widespread low cloud with bases 400-500m before dawn. Visibilities quickly increasing after dawn and becoming excellent by late morning, with distance hills visible. Patchy low cloud developing again towards midnight obscuring some summits.

Temperature: **Valleys:** Plus 13 Celsius rising to Plus 18 Celsius.
At 600m: Plus 10 Celsius rising to Plus 12 Celsius.
Freezing level: Above the summits.
